

▶ PERMIT MANAGER

The right tools for the job: If you have been frustrated in the past with expensive and complicated software, you will love Progeos' easy to use intuitive solutions.

Manage Permit Requests Over the Web: Municipalities can reduce the effort of the permitting process, collect permitting fees and collect additional convenience fees.

Create Permit Applications: Residents and businesses can reduce time and transportation costs by creating permit applications online.

Create New Revenue: Municipalities can charge for permit applications, with users being notified of approval by email. Convenience fees can be added when patrons use an online system to apply for permits.

Spatial Search: Permit applications can be mapped online, providing a visual assessment of permitting trends (only available if users have purchased Land Manager).

Use from Home: Using Progeos' web-based municipal tools, residents and businesses can access valuable information 24/7.

Use only what you need: You only pay for the services you want to use, and they can be turned on when you are ready for them. Services include tools for:

- Land Management
- Property Management
- Service Request Management
- Code Enforcement
- Permit Management
- Road Management
- Zoning Request Management

All for an affordable fee – with no hidden costs

▶ A BETTER SOLUTION

▶ MODULAR APPROACH

▶ FEATURES

▶ BENEFITS

Powerful, Easy to Use Tools:

Progeos Permit Manager guides users through online permit applications, and allows any time of permit to be handled online. For example, residents applying for a building permit or a construction company needing a permit for a subdivision can both benefit from this online feature.

By using Progeos Land Manager in conjunction with Permit Manager, users can search for permits that they have applied for from their home or office. The tool allows users to see past permit applications, see the status of current permits, and apply for new permits.

Employees and municipal decision makers can analyze trends in permit applications using query and reporting tools within the software.

Affordable Web Technology

Progeos' affordable fee with no hidden costs helps make your online municipal services a reality.

Flexible Tools

Permit Manager can be updated and customized by the municipality to meet local permitting needs. For example, the Progeos tools allow a user to create new permit types, categories, and applications.

Progeos tools are completely web-based, increasing access to your municipality's services by creating a 24/7 town hall.
