

Ten Things Progeos Can Do For Schools, Colleges and Universities ...

1. Progeos supports the move to faster, more transparent e-services by using the Web to integrate and automate service requests and online mapping.
2. Progeos improves campus services by automating service requests and by using the Web to integrate department actions on these requests.
3. Progeos reduces costs by allowing campuses to use web services to integrate and share service request functions.
4. Progeos reduces the cost of software by eliminating or reducing computer, license and consulting expenses.
5. Progeos online service request tools allow students, faculty and staff to submit requests at their convenience, freeing up resources in both residential life and building and grounds offices.
6. Progeos helps ensure the maintenance and upkeep of campus properties through online work order management.
7. Progeos reduces the time staff and vendors require to obtain detailed maps and services through online web access.
8. Progeos saves energy and helps the environment by allowing students, faculty and staff paperless access to services from their residence halls, offices and homes.
9. Progeos tools allow maintenance departments to track and map the number of different service requests being generated, allowing better planning and budgeting.
10. Progeos allows department heads and campus leaders to monitor services effectiveness through real time access to service statistics.
