

Ten Things Progeos Can Do For Municipalities ...

1. Progeos supports the move to faster, more transparent e-government by using the Web to integrate and automate town services and data.
2. Progeos improves municipal services by automating service requests and by using the Web to integrate department actions on these requests.
3. Progeos reduces costs by allowing Regions to use Web services to integrate and share municipal functions.
4. Progeos reduces the cost of government by eliminating or reducing computer, license and consulting expenses.
5. Progeos increases tax revenue by reducing the time to process permits.
6. Progeos helps ensure the maintenance and upkeep of foreclosed properties through code management and enforcement.
7. Progeos reduces the time residents and businesses require obtaining maps, permits and services through online Web access.
8. Progeos saves energy and helps the environment by allowing businesses and residents paperless access to services from their offices and homes.
9. Progeos enables new revenue sources by allowing municipalities to charge for the convenience of home and business access to maps, permits and other services.
10. Progeos allows town leaders to monitor effectiveness through real time access to service statistics.
